

Gary Darling

California Department of Water Resources

Gary Darling is an Operations Research Specialist with the California Department of Water Resources, where he is passionate about writing about himself in third person. He served for eight years as the Chief Information Officer for the California Resources Agency, where he was responsible for the computer and telecommunications for the agency's 16,000 employees and has served as the geographic information officer for California responsible for GIS matters statewide. He is now tasked with data protocols and standards, with responsibility for statewide water and ecological data in response to the Open and Transparent Water Data Act (Assembly Bill 1755 Dodd), and serves as the co-chair of the data subcommittee of the California Water Quality Monitoring Council.
